

SQUARE BARRIER GATE ARM ADAPTER

Replace Costly Wooden Arms with PVC

AGW Square Barrier Gate Arm Adapter
Zinc-plated, steel construction. Easily installed on most all barrier gate operators

AGW Square Folding Arm Assembly
Extremely durable, self lubricating joint assembly with cable hardware

SQUARE ARM ADAPTER AND FOLDING ARM ASSEMBLY

REUSABLE PVC ARMS CUT COSTS AND DOWN TIME

The AGW Square Barrier Gate Arm Adapter frees you forever from replacing costly and fragile wooden arms.

The Square Arm Adapter easily fits into most all existing operator arm flanges. A length of 2ft"-square PVC is then inserted into the Square Arm Adapter and fastened with set screws.

PVC Barrier Arms can generally be reused after contact with a speeding vehicle. The Arm bends at the insertion point and can usually be straightened manually and continue to function until replacement is convenient.

The Square Folding Arm Assembly is a uniquely designed configuration utilizing a machined, self-lubricating, high density plastic for the folding joint, and light, high-tensile cable for the lift. The Folding Arm Assembly is much more durable than the typical sheet metal assembly, and in most cases can be reused with little or no adjustment after contact with speeding vehicles.

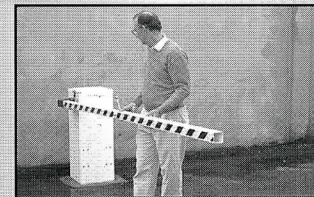

The Square Arm Adapter is guaranteed for the life of the facility.

The Square Arm Adapter, the Square Folding Arm Assembly, and the PVC Barrier Gate Arm are each sold separately.

Crash Test Proves Durability

Manually straighten arm.

Your lane remains in service.
